

Data Center Lift and Shift

When relocation meets precision.

Data center moves are high-stakes. Timelines are tight, assets are valuable, and risk is everywhere. Guardian delivers secure, end-to-end relocation with white-glove care and certified precision

Why Partners Choose Guardian

- **Proven reliability:** Hundreds of successful lift-and-shift and decom projects nationwide — zero missed deadlines.
- **Single coordination point:** One team handles all logistics, packing, and secure transport.
- **Certified chain of custody:** Locked trucks, GPS tracking, background-checked technicians, and documented hand-off.
- **Onsite project management:** From planning to execution, our team keeps you and your client informed every step of the way.
- **Flexible scale:** From single racks to enterprise-level data centers, Guardian adapts to every environment.

Partner With Confidence

Lift and Shift projects shouldn't feel risky. With Guardian, you get secure execution, transparent communication, and peace of mind — every time.

Guardian Full Suite of Services

THE GUARDIAN DIFFERENCE

Preparation. Precision. Partnership. Every move is planned in detail, rehearsed before execution, and supported by real-time communication. When challenges arise, our eTeam responds immediately and keeps your client calm and confident.

A REAL IMPACT

“With Guardian, I didn’t get a single call about problems. The project ran flawlessly from start to finish.”

Marc Mermelstein

Director of Engineering and Operations APEX Global Systems

Let Guardian handle all your onsite services so you can handle everything else.
